INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference	FOR FURTHER ACTION	see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.			
International application No.	International filing dat	te (day/month/year)	(Earliest) Priority Date (day/month/year)		
PCT/US03/10491	os APRIL 2003		04 APRIL 2002		
Applicant MANOR, GEDALYAHU					
This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of sheets. X It is also accompanied by a copy of each prior art document cited in this report.					
1. Basis of the report					
a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item. the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).					
b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:					
contained in the international application in written form.					
filed together with the international application in computer readable form.					
furnished subsequently to this Authority in written form.					
furnished subsequently to this Authority in computer readable form.					
the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in					
	the statement that the information recorded in computer readable form is identical to the written sequence listing has b een				
	Certain claims were found unsearchable (See Box I).				
3. Unity of invention is lacki	Unity of invention is lacking (See Box II).				
4. With regard to the title,					
X the text is approved as sub	X the text is approved as submitted by the applicant.				
the text has been established by this Authority to read as follows:					
5. With regard to the abstract,					
the text is approved as sub	mitted by the applicant.	_			
the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.					
6. The figure of the drawings to be published with the abstract is Figure No. 1					
X as suggested by the applica	nt.	•	None of the figures.		
because the applicant failed	to suggest a figure.				
because this figure better c	haracterizes the invention				

Form PCT/ISA/210 (first sheet) (July 1998)★

INTERNATIO: L SEARCH REPORT

ernational application No.

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

A traveling rolling digger (1) for sequential hole drilling or for producing sequential cultivated spots in soil. The traveling rolling digger (1) includes at least one drilling shaft which is rotatable by a drive mechanism about a longitudinal shaft axis and has a rotating soil penetrating edge. The drilling shaft is mounted to roll about a horizontal shaft in a soil penetrating plane while the horizontal shaft moves in a direction of travel of the traveling rolling digger. The rotating drilling shaft enters the soil at an entry angle and digs into the soil while the horizontal shaft moves in the direction of travel and the drilling shaft continuously changes its angle relative to the soil from the entry angle to a vertical position. The traveling rolling digger further comprises at least one cleaning blade (6).
